EDUCATION

Rice University | Houston, TX MAY 2021

B.S. in Computer Science; RCEL Certificate in Engineering Leadership; GPA: 3.65/4.00

Relevant Courses: Computational Thinking, Algorithmic Thinking/Discrete Mathematics, Program Design, Reasoning about Algorithms, Introduction to Computer Systems (Spring 2019), Principles of Parallel Programming (Spring 2019)

Stuyvesant High School | New York, NY JUN 2017

SKILLS

Tech Languages: Python, Java, HTML, CSS, Sass, JavaScript, LaTeX

Tools/Frameworks: Git, Bash, React

Languages: Fluent in English, Cantonese Chinese, and Mandarin Chinese

EXPERIENCE

BlackRock – *Front-End Development Intern* **| New York, NY** JUL 2018 – AUG 2018

- Created web UI in React for monitoring metrics of an internal investor tool that manages data from third-party sources
- Led a group of 5 interns to present to managers about the current financial markets and its implications

eBay – *Extern* **| San Jose, CA** MAR 2018

- Collaborated to devise go-to-market strategy, utilizing research analysis, for an early-stage product presented to the CIO in a 2-week externship

BlackRock – *Finance Operations Support Intern* **| New York, NY** JUL 2017 – AUG 2017

- Utilized the implementation life cycle of a transfer-pricing model to improve method of distributing internal revenue
- Designed more efficient Excel formulas and functions to sort through 9,000 lines of data

Girls Who Code Summer Immersion Program (SIP) – *Student* **| New York, NY** JUL 2016 – AUG 2016

- Selected and participated in an intensive program of computer science classes and discussions with current tech leaders
- Created interactive experience *In The Eyes of a Refugee* using Python, to educate the public about Syria's refugee crisis by telling a narrative behind the true experiences of a refugee

PROJECTS

JSON Recursive Descent Parser | Houston, TX – *Coursework* OCT 2018

- Implemented Java top-down recursive parser that takes in JSON and separates it into internally recognized Java classes
- Accurately constructed parse trees by following a specific grammar and without use of mutation

Part-of-Speech Tagger | Houston, TX – *Coursework* APR 2018

- Built Python program that processes sentences and tags words by their part-of-speech
- Achieved 97% accuracy on second-order hidden Markov model; 96% accuracy on first-order hidden Markov model

Blind Recruit | New York, NY – *Independent* JAN 2017

- Developed group project for Social Hacks hackathon that removes gender-biased words from resumes given a PDF/image
- Created back-end portion of the project using Python and Stanford's NLP API to parse through the words in image

AWARDS

2018 Facebook Grace Hopper Celebration Scholarship Recipient

- Selected as 1 out of 50 women internationally to attend the Grace Hopper Conference on the scholarship

LEADERSHIP EXPERIENCE

HackRice – *Social Media and Outreach Manager* **| Houston, TX** JAN 2018 – PRESENT

- Spearheaded new efforts to rebrand HackRice and attract an even more competitive and diverse group of participants
- Increased public visibility of HackRice online platforms by 60% by creating new content and rebranding

Martel College Executive Council – *Secretary* **| Houston, TX** JAN 2018 – PRESENT

- Elected by my residential college of ~400 students to represent Martel College students in government discussions/votes
